

INTERNATIONALIZATION PLAN 2023

Through internationalization, we wish to provide our society with a broad perspective on the present world, allowing us to access the opportunities offered by other countries and to prepare ourselves for the increasingly global challenges of the future.

Participation in the Erasmus+ program

This is our main means of internationalization, through which we wish to develop the European dimension of our institution and convey to our society the vision of Spain as part of the European Union with which we share values and challenges.

We contribute to the achievement of EU objectives by using digital technology and the competencies of the educational community to promote transparency and objectivity, reduce the consumption of resources, guarantee equal opportunities and inclusion.

Our operational objectives for the coming years are:

1. To maintain and renew the Erasmus Charter for Higher Education.
2. To maintain and renew the Erasmus Vocational Training Accreditation.
3. To maintain student mobilities for FCT internships and strengthen those of post-graduates.
4. To maintain the mobility of both Higher Education and Vocational Training personnel.
5. To begin to carry out teachers' international mobilities.
6. To improve and enlarge our network of partners and collaborators.
7. To participate as partners in COVE projects
8. To apply for projects in consortium with other institutions
9. To maintain and renew, when necessary, our Erasmus+ commission.

Other ways of internationalization:

- Participation in bilingual stays of teachers in English-speaking countries aimed at improving their linguistic competence with a view to teaching in bilingual programs.
- Cultural trips to the United Kingdom.
- Consolidation of the 6 bilingual programs and incorporation of new ones.
